2015-09-29

Dear Mr Dolganov,

I would like to convey to you my sincere appreciation for the valuable contribution you made to the preparation of The Fukushima Daiichi Accident – Report by the Director General and Technical Volumes, in particular to Technical Volume 1 - Description and Context of the Accident. The report is the product of the dedicated efforts and the determined commitment of over 180 experts from 42 Member States and several international bodies. The report would not have been possible without the vital contribution and valuable feedback of those who were involved in the various specialized parts.

The report presents an assessment of the causes and consequences of the accident and provides a knowledge base for existing and future generations. I am confident that, as a result of this report, lasting improvements will be made that will continue to strengthen nuclear safety, enhance emergency preparedness and reinforce radiation protection of people and the environment throughout the world. I trust that the observations and lessons from the accident will continue to be acted upon by governments, regulators and nuclear power plant operators worldwide.

Please accept my sincere gratitude for your active participation and the constructive spirit you demonstrated during the working group meetings and throughout the drafting and review of this report. I believe that it is thanks to your support and commitment during the entire project that we have succeeded in taking significant steps forward in our continuous efforts to strengthen the global nuclear safety framework.

Yours sincerely,

Denis Flory

Deputy Director General

Head of the Department of Nuclear Safety and
Security
